

[TEMPLATE] Our Great Project

by Team Members

Introduction

Summarize your project's purpose.

Who does your project serve?

What was the problem you set out to solve?

What aspects did you choose to focus on?

Demo!

Show off your site/service!

You should spend about 5 minutes showing what you got finished and pushed out to your beta stack.

It's a good idea to have a plan of what data you'll use for your demo and run through it in advance to catch any hiccups before your presentation.

New skills/technologies

for example,

- CSS Styles
- HTML forms
- JavaScript Promises
- Bootstrap
- React
- ...

Challenges

What challenges were there facing the project that you knew about going in?

What unexpected challenges appeared once you were underway?

What you learned

What did doing this project teach you about software development on a team?

How is your project or what you learned important?
